

# Your partner for aquaculture reproduction

When you choose to buy from the IMV Technologies group you are buying so much more than just a product. We ensure that our customers are comfortable in using their chosen scanner for it's range of applications, so that they get the very most out of their investment.

### What would you use it for?

Both our ExaPad and Easi-Scan:Go are fit for purpose in the fish scanning environment but depending what you would use it for mostly, one system could be more suitable for you.

Probes

Probe Model	Weight Range	Application
LC1813V	250g	Fish sex sorted (25-40g)
LC1428V	500g - 750g	Fish sex sorted (25-40g)
LC1038V	1kg - 2kg	Fish sex sorted (25-40g)
